

Keshav Singh

Gen-AI Engineer | Full-Stack Web Developer

keshavsingh3815@gmail.com · +91 6204663595 · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Computer Science engineering student and backend/Gen-AI engineer with production experience across fintech co-lending orchestration and ML-driven financial analytics — FastAPI/PostgreSQL backends, async data pipelines, RAG and LLM-orchestrated features, and React/TypeScript frontends end to end.

EXPERIENCE

Simplifyai — Gen-AI-Engineer

FEB- 2026 – Present

SimplifyJF — co-lending orchestration module, SimplifyCredit platform

Python · FastAPI · PostgreSQL · Celery/Redis · Cerbos · React 19

- Built the joint-financing (co-lending) module owning partner config, RAC/eligibility rules, order pooling, and an append-only sub-ledger — ~35 backend services, 11.8k-LOC core router, 21 forward-only DB migrations.
- Implemented the repayment allocation/split engine, settlement & netting, and a reconciliation workflow with break-handling, using transparent statistical matching (weighted score + Jaccard) instead of a black-box model.
- Delivered async job orchestration (Celery/Redis) for pool creation, TTL-based reservation expiry, and SLA/settlement timers, plus internal officer and partner-facing portals on org-scoped RBAC and maker-checker approvals.

SimplifyInsights — financial analytics & credit-scoring platform

React · TypeScript · FastAPI · PostgreSQL · scikit-learn/XGBoost · LangChain · Go

- Developed a full-stack analytics platform serving normalized statements, KPIs, and ML forecasts for 945+ IDX-listed companies, behind a Kong gateway with Go BFF/auth/billing sidecars.
- Built an async ingestion pipeline (Playwright crawler → Celery → PostgreSQL) parsing XBRL Excel/PDF filings into a normalized schema, raising filing-slot coverage to ~96%.
- Shipped ML credit-scoring and forecasting services (scikit-learn/XGBoost, MLflow) and an SSE-streamed RAG chatbot behind a governed LLM orchestrator with prompt-injection guarding and output scanning.

PROJECTS

Freequademy — AI-Powered Learning Platform

GitHub

React · Vue · Node.js · MySQL · LangChain

- Built a student-centric education platform offering free learning resources, mentorship, and community features.
- Implemented a RAG-based chatbot that answers questions grounded in user-uploaded notes, PDFs, and syllabus documents.
- Shipped LLM-driven modules for MCQ generation, concept explanation, and content summarisation.

APC — Community & NGO Engagement Platform

GitHub

React · Node.js · Express · MySQL · Tailwind CSS

- Built a community platform to manage members, volunteers, books, and initiatives for an NGO.
- Developed role-based onboarding and contribution-tracking modules.
- Implemented a book management system and engagement dashboards.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, Go, SQL, HTML5, CSS3
Frontend	React (18/19), Vue.js, TanStack , Zustand, Tailwind CSS, Bootstrap.
Backend	FastAPI, Node.js, Express.js, PHP, Pydantic v2, Celery.
GenAI / LLM	LangChain, LangGraph, RAG, OpenAI API, LiteLLM , ChromaDB, pgvector.
Data / ML	pandas, NumPy, scikit-learn, XGBoost, MLflow, Playwright (crawling), pdfplumber/openpyxl
Databases	PostgreSQL (asyncpg, SQLAlchemy, Alembic), MySQL, MongoDB, Redis
Infra / Platform	Docker, Kong API Gateway, Cerbos (RBAC), Zitadel OAuth2, NATS , MinIO/S3, OpenTelemetry, Prometheus, Grafana
Tools	Git, GitHub, Postman, Linux, VS Code, Figma

EDUCATION

B.E. Computer Science — Chandigarh University, India

2022 – 2026

CERTIFICATIONS

- Multi-Core Computer Architecture — NPTEL, IIT Guwahati · Elite · 2023
- Internet of Things: Design Concepts & Use Cases — SWAYAM, NITTTR Chandigarh · 2024
- Blockchain Technology using Ethereum & Polygon — Metacrafters × Chandigarh University · 2024
- Introduction to Blockchain and Ethereum — Infosys Springboard · 2024
